NOTE: ATC Regulation 37-3, par 2, d, provides that Pilot must have had at least two trips over the route normally flown for the purpose of familiarizing himself with the airway and air navigation facilities including conditions of airports, approach channels, corridors, etc. As an illustration of this, let us assume that a pilot makes a trip to Leyte by way of Hickam, Johnston, Kwajalien, Guam, and Leyte, and returns the same route. This would qualify him over this route by virtue of having flown the identical route both ways, or twice over the same route.
